

EORN – Who We Are

FURTHER...FASTER

EORN Inc is a not-for-profit company established by the Eastern Ontario Warden's Caucus Inc to oversee the creation of one of the largest, most comprehensive broadband projects in the country. It is a project covering some 50,000 square kilometers, an area larger than 109 countries in the world.

EORN will include:

- A high-capacity Gigabit Ethernet fibre backbone transport ring;
- An access, or last mile, component; and
- Access to satellite service for those who cannot, for reasons of low population density or difficult terrain, easily connect to any other type of broadband service.

The EORN Board of Directors will manage the contracts with the various ISPs who will operate and maintain the system. The EORN Board of Directors is comprised of membership from the Eastern Ontario Wardens' Caucus, Eastern Ontario Mayors, Committee, First Nations of Eastern Ontario and the private and public sectors. The day to day operations will be performed by a small team of individuals who will see the project through to completion by 2013.
